

France, Spain and even Greece, finally Portugal – Communism between Cuba, Algeria, India and China again

By Shomit Sirohi

I. European Social Movements and Leftist Governments – their Economic Plan with EU

In fact the crisis is now minimal, it is just a basic budget planned for the economy and dynamics of capitalism which then produces the contradiction of social movements like Catalan, peasant movements and even CCOO working class and PCF trade unionism, which then becomes a major Communist movement in Portugal while Syriza wins therefore in Greece.

The EU wants a cultural criticism alongside its economics and is busy working with World Bank, IMF for the American companies and is talking to Sirohi, myself on the process of dynamics in Stieglitz format which introduces an architecture and regime of accumulation, which then organises an EU or Europe which has dynamic sectors in France mainly but also Spain, with Greece as well alive in the Eurozone.

II. Macron and French Left Debates – what is called a Fact in Europe

In fact PCF and the Left is now debating the next PM in France – and Macron disagrees and is instituted in for the next 10 years it seems. The fact sees in fact women, students, and working class unions, even peasants as the new re-formulation of the Communist and Leftist politics becoming the center-stage moment because in fact the right has lost hands-down by a simple PCF tactic – trade unionism and social movements 'l'unitie' which means in fact that there is a Communist resurrection in the third world again, with Chinese mass line, Cuban protest revolts and Algerian upsurge with Indian mass revolt.

III. Communism – the Old and the New

In fact the Communists are back – the Spectre of Hegel, in fact Althusser is busy working on Deterior – Deterior is a capitalist and Communist company which then is how to be objective – is Spirit even the poorest dialectician who lives in a Hotel – hotel management is what De Gaulle is talking about again.

I call all of this – Sirohi as what is called Prophetic.
